BETAFENCE
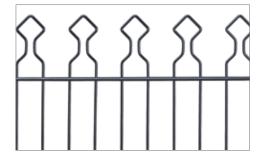

Decofor®

Panels

The Decofor system is a complete decorative fencing system developed for design oriented and rigid fencing solutions.

Product detail

BENEFITS

Decorative

Decofor is a professional fence with a unique contemporary design. The panels are robust and yet extremely elegant and decorative. The panels, posts and gates are perfectly harmonised.

High longevity

Betafence's coating technology is state of the art and guarantees a high longevity. After galvanising an adhesion coating is applied for a perfect bond with the final polyester coating.

Easy installation

The system is easy to install. All elements are precisely integrated. The Decofor system allows installation between and on walls.

Complete system

There are 2 types of Decofor: Arco (convex) and Recto (flat panels). They all exist in diferent heights, with accompanying posts, swing gates (single or double) and installation accessories. All of one uniform design.

Security level

LOW   HIGH

Applications

PUBLIC SPACES & BUILDINGS   RESIDENTIAL

Functionalities

DEMARCATION   DESIGN

Panels

The panels are 2015 mm wide and available in 4 heights. The mesh size is 200 x 65 mm.The wires are very strong: horizontal double wires 8 mm and vertical 6 mm.

Gates

The Decofor fencing system can easily be combined with single and double Decofor gates.

Coating technique

Panels, posts and gates are first galvanised.
Afterwards an adhesion coating is applied for perfect bond with the final polyester coating. The minimum coating thickness is 100 micron (panels) and 60 micron (posts and gates).
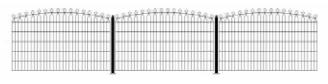

Colours

Decofor Arco: available in black (RAL 9005).
Decofor Recto and other colours: available on request.

Posts and fixing systems

The posts are welded square tubular posts with profile of 60 x 60 x 1,50 mm. For a decorative design the posts are supplied with a metal cap with ball.
Fixation of the panels to the posts by means of metal fixing collars (galvanised and plastic coated) and with security bolts M8 out of stainless steel with self breaking nut.

Decofor Arco

Decofor Recto

Decofor Arco width x height (middle of the panel) mm	Decofor Recto width x height mm	Post length mm		Number of collets per post
