

Rempart

Welded fence with progressive mesh for long distances. Ideal along highways or railways.

Benefits

Strong and rigid

Heavy wire diameters, welded at every intersection. Fence height up to 2.5m.

Long lifetime

The Zincalu coating ensures a high longevity of the fence. Very good price/quality ratio. Degressive mesh repartition possible.

Long distance

Optimal solution for long distance fences.

Functionalities

Security level

(when compared to other **roll** options)

Post and fixing systems

(post shape illustrated below)

Bekaclick®

Metal posts **Ø48mm or 60mm**, with fixing strip for easy rolls installation fixed to the post with stainless steel fixators. Plastic cap on top of the post. This assortment is completed with round brace post for efficient installation. No stretcher or tension wires are needed for installation with Bekaclick post. DIY installation is available with polyamide clips instead of stainless steel fixators. A specific tong is recommended as well as a tension comb for perfect installation.

Round posts

Metal posts **Ø38 to 60mm**, with one wire holder on top is an alternative solution. Round brace posts are compatible. You'll need tension wire, attach wire and stretcher to complete your installation.

- For more information on the above posts, please refer to the relevant product page or flyer

Rolls

Welded fence with progressive mesh. Length of rolls: 50m.

- Selvedge wire: Ø3.40mm
- Horizontal and vertical wires: Ø2.45mm
- Double crimp in the horizontal wire in every mesh
- Tensile strength of the line and cross wire: 400 N/mm²

Coating technique

Zincalu: alloy of zinc and aluminium (95% zinc plus 5% aluminium).

Mesh dimensions

Other dimensions, roll lengths and executions are available on request.
