Securifor® 3D

Panels
The Securifor 3D system is a complete system developed to combine high security and aesthetic design.

Product detail

BENEFITS

High security
The panels are heavy welded mesh with small rectangular apertures. Because of the large wire diameter (4 mm) and the restricted size of mesh (12,7 x 76,2 mm) Securifor 3D offers maximum security.

Attractive design
The horizontal bends make the Securifor 3D system ideally suitable for an environment where security and aesthetics go hand in hand.

Long lifetime
Betafence's coating technology is state of the art and guarantees a high longevity.

Good visibility
In spite of the small mesh aperture the see-through characteristics remain unimpaired when viewed head-on and even at an angle to the fence. This is particularly important for clear camera surveillance.

Complete system
Supplied as a complete system with panels, 2 possible post systems and gates. Installation on a slope is also available.
