

Securifor® Defender

ULTIMATE ANTI-GRIND DELAY FENCE

Product detail

The Securifor® Defender system is an independently tested & certified High Security ANTI GRIND, ANTI CLIMB DELAY fencing system.

FEATURES & BENEFITS

- ASTM 2781-15 forced entry resistance certified
- Exceeds ASTM forced entry resistance requirements - minimum of 6.8 MINUTES aggressive threat delay
- Over 40% Visibility Index ensuring good visibility when combined with surveillance cameras
- The fence is made up of 2 panels with integrated vertical panels to reinforce the cavity.
- Integrated fixators securely connect the front and back panels
- Compatible with detection technologies
- Easy and fast to install
- Retro fit possibilities

Security level

Applications

Functionalities

Tested and certified

Securifor® Defender is independently tested at an accredited ASTM testing facility and is certified to ASTM F2781-15 standards. as follows:

Threat level	ASTM requirement	Structured test	ASTM Rating	Used tools
Low	N/A	Exceeded	16.7 minutes	Hammer / Saw /Crowbar
Medium	10 minutes	Exceeded	13 minutes	Bolt cutter / Angle grinder
Aggressive	5 minutes	Exceeded	6.8 minutes	Gasoline powered angle grinder

Anti-Personnel Fence Solution

Securifor® Defender exceeds ASTM forced entry resistance requirements and its small apertures make climbing or scaling the fence virtually impossible.

Tested to ASTM standards, Securifor® Defender is the ideal fencing solution for high security applications such as:

- Oil & Gas
- Critical Infrastructure
- Industrial Facilities
- VIP Protection
- Military Facilities

The System

To increase resistance to forced entry attempts, our modular cassette design consists off:

- Two attack mitigation fence panels front and back
- Vertical separator panels to strengthen the cavity.
- A cover plate and one way security bolt to fix the panels to the posts.
- Optional extras like razor tape wire or barbed wire

Parts

The unique and patented system consists of:

1. Securifor® Front panels
2. Securifor® Back panels
3. Securifor® Vertical panels
4. Rectangular posts
5. Coverplates
6. One way bolts
7. Spirals to connect front and back panel
